Day & Night Solar

Marketing and Sales Support

Your Business Development Partner

We are positioned to empower electrical contractors with direct market advantages in design, estimating, procurement and installation. Business is about quality and the ability to work with a company that stands behind their word and their work.

Value added services with a teaming approach.

1. Complete our Request for Proposal; gather the critical data needed for the design.
2. Provide us with the project details; including 12 months of utility bills and site/building plans.
3. Will provide you with remote and on-site sale assistance to present the solar financial and product package to your client.

These advantages are being made available to participating contractors who can directly benefit from a group of direct factory product(s) allowing them to capitalize on the labor and material savings.

"DNS was patient and helpful in walking McPhee through theturnkey process."
Michael Balinskas - PowerHawke, Inc. a Phalcon Company
