

FOR IMMEDIATE RELEASE

New local energy partnership brings innovative solar tracker to Mid-Atlantic and Midwest region

Collinsville, IL . . . April 30, 2013 . . . A new partnership will bring the innovative [AllSun Tracker](#) solar electric system to homeowners and businesses in the Mid-Atlantic and Midwest.

The dealer partnership between local installer Day & Night Solar of Collinsville, Illinois and award winning solar tracker manufacturer AllEarth Renewables was announced today.

The first AllSun Tracker installed by Day & Night Solar was commissioned in November 2012 in Ava, Illinois.

The [partnership](#) will bring the locally manufactured solar trackers initially throughout regions in western Pennsylvania, Ohio, and Missouri.

Day & Night also has representatives in Arizona, Florida, Hawaii, North Carolina, and Tennessee. The company is a solar solution system integrator, providing full service solar engineering, design, installation and equipment services for homes, businesses, municipal buildings and nonprofits.

Designed and manufactured in Williston, Vermont, AllSun Trackers use innovative GPS and wireless technology to follow the sun throughout the day to boost solar energy production by up to 45 percent over roof-top installations. The ground-mounted solar systems are designed for homes, businesses, non-profits, and commercial-scale installations.

A single 6 kW [solar tracker](#) will produce enough to power the majority of an average home.

“We are committed to meeting our growing customers’ needs and the AllSun Tracker is an excellent addition to our installation options. More and more people are excited about creating their own source of energy and with the AllSun Tracker they can optimize their production and get a better return on investment,” said **Bob Eaton, Managing Partner of Day & Night Solar.**

“We are excited to be partnering with the team at Day & Night Solar and to be able to provide our product to new regions in the Mid-Atlantic and Midwest. Designed to produce more energy from the sun, our trackers make solar practical and affordable for more homeowners and businesses,” said **David Blittersdorf, President and CEO of [AllEarth Renewables.](#)**

The AllSun Tracker was selected as a top-10 green product for 2012 by *BuildingGreen* Magazine. AllEarth Renewables, a 2012 Inc 500 company for fastest growing businesses, has designed, manufactured, and installed over 1,400 complete grid-connected solar tracker systems. Their CEO was listed among 25 of “America’s Most Promising Social Entrepreneurs of 2011” by *Business Week*.
